

Solar Village Project

SOCIAL ENTERPRISE TIME LINE 2021 -2025

Ending energy poverty through sustainable development.

2021

SVP SOCIAL ENTERPRISE LAUNCH

The SVP social enterprise officially launches in the Bahraich District of Uttar Pradesh, India. 1,000 remote enabled solar home systems are deployed bringing sustainable and consistent access to electrify to over 5,000 people. Households that participate benefit from access to reliable, clean and sustainable electricity.

2022

IMPACT EVALUATION AND GROWTH

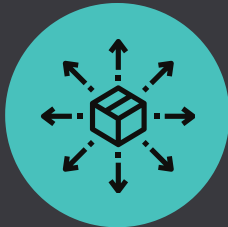

Utilizing feedback collected from customer surveys and data generated from the internet connected solar systems SVP expands its reach within the Bahraich district bringing access to reliable and sustainable energy to another 5,000 households and 25,000 people.

2023

SCALE AND EXPAND

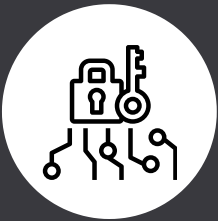

With SVP's success and continued growth in the Bahraich district the enterprise expands into the neighboring district of Sitapur. Between the 2 districts 20,000 solar lighting systems are distributed.

2024

NEW OPPORTUNITIES

SVP continues to expand its reach providing solar power to energy impoverished communities and begins offering services such as solar powered water pumps for subsistence farming irrigation and water purification systems.

2025

THE SKY IS THE LIMIT

Over 50,000 solar home lighting systems have been distributed. Hundreds of thousands of people are benefiting from access to safe, reliable and sustainable electricity. Power for all in the 21st century comes closer to reality.
